"Among the hazards of speculation the happening of the unexpected --I might even say the unexpected - ranks high. There are certain chances that the most prudent man is justified in taking - chances that he must take if he wishes to be more than a mercantile mollusk--" Reminiscences of a Stock operator.

THE GRANDE' GRAINS

Bi-Weekly Update

Beans typically are typically firm into the end of March. Buy dips as over the next few days as the Fed has gone all in now and where it leads no one knows... Towards the end of next week we want to turn sellers and be short into the first part of April. Many times those sell offs can be deep .and nasty... Selling May Beans at the end of March should yield some nice gains... Eventually we want to buy into the dip into mid April and hopefully at much lower prices...Wheat Conversely makes lows into the end of March and pretty much stays weak into June... We want to sell Wheat on this rally... and remain short...
